If you are painting over a dark colour, first apply a coat of white paint to give a lighter base colour, then apply the top coat.

1. Paint your full wall with 2 coats of your chosen pale colour. Use pencil marks to guide where your stripes will be.

2. Use masking tape to line the top and bottom of each stripe on the wall. Use a spirit level to ensure your lines are straight.

3. Paint the stripes in your chosen colours. For the best result paint one colour at a time and allow to dry.

**TIP!**
Remove the masking tape before the paint is fully dry to achieve a neater edge.
